1 Introduction
The University of Copenhagen conducts graduate surveys for all professional Bachelor’s, Academic Bachelor’s, Master’s Candidatus and Master’s degrees, as well as Diploma and Academy Profession (AP) programmes according to a shared concept of data collection developed across the faculties.

The graduate surveys gather information about what the graduates are doing after their graduation, and how conditions during their studies have been influential in their later employment situation. Among other things, the graduates assess to what degree the skills achieved from their education have been relevant and sought after in the jobs they get after completing their education. Moreover, the graduates evaluate whether their education has been structured to ensure that the study programme can be completed without delay, and whether there is anything in the programme that could be improved to better prepare them for the job market.

Education Services at the University of Copenhagen is responsible for the graduate survey itself. Rambøll handles the acquisition of data and prepares a report based on the data from the questionnaires. The reporting of the graduate survey takes place on three levels: university, faculty and educational programme. This report is for Agriculture.

Compared to previous reports in connection with the institution accreditation, the 2017 reports also include small, built-in analyses by cross-referencing information. The background for this is the fact that the results of the questionnaire had been adapted and reworked by the individual institutes. Therefore, Education Services has in collaboration with Rambøll worked on improving the report template so that the complete report can, as far as possible, cover the common needs that the institutions have.

The institution accreditation comprises an assessment of many educational programmes, all of which receive a report like this one. Therefore, it has been necessary to standardise the text so that it can be included generically in the reports for all types of educational programme. Throughout the report, there are guidance and notes on the individual sections and graphs. All faculties have received the complete data material for the faculty’s educational programmes, which are included in this graduate survey. Thus, this report provides an overview of the survey’s results, which can be further investigated by looking into the data.
2 Data

After the completion of their education programme, all graduates from the University of Copenhagen were invited to take part in the graduate survey. The University of Copenhagen offers the following types of education programmes:

- Academic Bachelor’s degree
- Professional Bachelor’s degree
- Master’s Candidatus degree
- Master’s degree
- Diploma programmes
- Academy Profession (AP) programmes (from 2016)

From 2015 all the faculties at the University of Copenhagen will use the same questionnaire for the collection of data in connection with graduate surveys in order to provide the opportunity to compare the results across educational programmes and faculties.

### 2.1 Table: Summary of collected data

Appendix 1 shows a summary of the questions from the questionnaire used in this report.
2.2 Background data from the study administrative system STADS

The individual graduates in the survey have been linked to the variables from the study administrative system STADS described in Appendix 2. The Table shows how representative the data is for Agriculture when the entire graduates who were asked to reply to the questionnaire were compared to the graduates who chose to participate by responding to the questionnaire based on the background variables.

Among the background variables, the following variables from STADS are considered significant when it comes to studying how representative the graduate survey is:

- Gender
- Average age at study start/average age at graduation
- Completion time of Bachelor’s and Master’s Candidatus studies
- Grades for thesis/Bachelor’s paper
- Graduates who are foreign citizens
- Quota 1/2

2.2.1 Table: Facts about the respondents, broken down into graduate status

<table>

</tbody>
</table>

For future analyses of data from graduate surveys it can be relevant to examine, aside from being representative, whether the data can be biased. Respondents could, for example, be biased in the assessment of their education, if they are unsuccessful on the job market.
2.3 Reading guide

In order to make the report more readable and to live up to various ethical principles, this section explains in brief how the data is presented in this report. The report has been made for many educational programmes; in addition, there are joint reports on faculty level and for the University of Copenhagen as a whole. As described in the introduction, it has thus been necessary to work with a standardised report structure, partly on financial grounds, both in terms of the content of the tables, graphs and the text itself. The following text is thus intended to help the reader in reading the report.

For the Agriculture educational programme, a report template has been used that comprises Professional Bachelor’s degrees, Academic Bachelor’s degrees and Master’s Candidatus degrees. For the University of Copenhagen as a whole, it makes sense to look at Master’s Candidatus and Professional Bachelor’s degrees in the same section, as these are programmes where the graduates complete their education at the university. The reader might though have a report for a specific education at hand that does not comprise a Professional Bachelor’s degree programme. At time of writing, the University of Copenhagen offers Professional Bachelor’s degrees in dentistry under the Faculty of Health and Medical Sciences and the Bachelor’s degree in Forest and Landscape Engineering at SCIENCE. The reader is therefore asked to consider that it has been necessary to standardise the text so that it also reads Professional Bachelor’s degree, even though this may not be relevant to the education written in the actual report.

### 2.3.1 Q.1.1. What is your current job situation?

<table>
<thead>
<tr>
<th></th>
<th>Master Candidatus</th>
</tr>
</thead>
<tbody>
<tr>
<td>I am employed (including leave of absence, maternity leave, job with wage subsidies, part-time hirings, etc.)</td>
<td>55% (17)</td>
</tr>
<tr>
<td>I am self-employed (including freelance)</td>
<td>0% (0)</td>
</tr>
<tr>
<td>I am unemployed (including on maternity leave without being under contract of employment)</td>
<td>26% (8)</td>
</tr>
<tr>
<td>I am in full-time education (e.g. Candidatus programme)</td>
<td>0% (0)</td>
</tr>
<tr>
<td>I am on a Ph.D programme</td>
<td>19% (6)</td>
</tr>
<tr>
<td>Other</td>
<td>0% (0)</td>
</tr>
<tr>
<td>Number of replies</td>
<td>31</td>
</tr>
</tbody>
</table>

Figures in this table can be included in the text in the individual sections. If there is a figure for candidates in this table, they could also be included in the following section on candidates, for example. The table here provides a complete summary of the types of figures included in this report.

For Q.1.1 in the table, the respondents have just one possible answer. If a respondent has a part-time job with supplementary benefit, the respondent should select the category, “I am in work”. In some cases, the individual questions in the questionnaire have just one possible answer; in other cases, multiple answers are permitted. With a single answer option, a percentage breakdown of the respondents according to answer will add up to 100 per cent as in a relative breakdown, and otherwise the sum of the percentages will be higher than 100 per cent. The graphs in the report thus provide a clear indication of whether there is a single answer option or multiple answers.

In general, the total “n” for the graphs and tables, as well as what it covers, is made clear in the text. In some situations, “n” is the total number of respondents in the graduate study while in other situations, “n” can be conditional on the respondents who are in work, for example. Based on the graph it is then possible to estimate how many respondents there are in the individual categories.
The graduate survey invites all graduates in a given population to answer the questionnaire, where the response rate can be small. The collected data does not therefore represent a complete survey, but rather a random sample. To ensure anonymity, when the number of respondents is small, the results on the following questions:

What is your monthly salary?  
Do you supplement the income earned from your primary occupation?  
Do you receive unemployment benefit or social assistance benefits in connection with your unemployed status?  
Why do you think you do not have a job at the moment?

Be aware that few respondents can increase the statistical uncertainty significantly, and the percentage indications can fluctuate a lot if one respondent is added or removed.
3 Current job situation of Master’s Candidatus/Professional Bachelor’s graduates

This chapter describes the job situation of Master’s Candidatus/Professional Bachelor’s graduates in their current position. The chapter includes sections on whether the graduates are in work, self-employed, unemployed or in full-time education.

3.1 Employed Master’s Candidatus/Professional Bachelor’s graduates

Employed Masters Candidatus/Professional Bachelors covers graduates in work, self-employed, unemployed or in full-time education.

3.1.1 Q.1.1. What is your current job situation?

The figure for question Q.1.1. shows the Master’s Candidatus/Professional Bachelor’s graduates’ current job situation, where the response categories show if they are in work, self-employed, unemployed, in full-time education, or on a Ph.d programme.

<table>
<thead>
<tr>
<th>Category</th>
<th>Number of replies</th>
</tr>
</thead>
<tbody>
<tr>
<td>I am employed (including leave of absence, maternity leave, job with wage subsidies, part-time hiring...)</td>
<td>17</td>
</tr>
<tr>
<td>I am self-employed (including freelance)</td>
<td>0</td>
</tr>
<tr>
<td>I am unemployed (including on maternity leave without being under contract of employment)</td>
<td>8</td>
</tr>
<tr>
<td>I am in full-time education (e.g. Candidatus programme)</td>
<td>0</td>
</tr>
<tr>
<td>I am on a Ph.D programme</td>
<td>6</td>
</tr>
<tr>
<td>Other</td>
<td>0</td>
</tr>
</tbody>
</table>

The actual number of respondents for each response category is shown to the right of the figure. Only one response category is possible.

3.1.2 Q.1.3. What are the conditions of employment in your current job?

The figure for question Q.1.3. shows the conditions of employment for the Masters Candidatus/Professional Bachelors in work, where the response categories show if they are hired on a fixed-term contract, hired on a project/temporary contract, hired as a substitute, or employed with wage subsidy.
The actual number of respondents is shown to the right of the figure. The distribution is shown as a percentage, and the number of responses is shown to the right of the figure. Only one response category is possible.
3.1.3 Q.1.2. How many jobs have you had (since completing your studies), before you started in your current employment?

Figure Q.1.2. shows the number of jobs Master’s Candidatus/Professional Bachelor’s graduates in employment have had before starting their current job.

There is only one response category, given the fact that they have had zero, one, two, three, four or more jobs. The total number of respondents is shown to the right of the figure.

3.1.4 Q.1.8. Within which sector is your place of work?

The figure for question Q.1.8. shows which sectors the Masters Candidatus/Professional Bachelors are employed in. The response categories show if they are employed in the private sector, the state, a region or a non-governmental organisation/interest organisation.

The actual number of respondents for each response category is shown to the right of the figure. Only one response category is possible.
### 3.1.5 Q.1.9./Q.1.8. Which industry does your place of work belong to? by sector

The table for question Q.1.9. shows which industry the Masters Candidatus/Professional Bachelors are employed in. For each industry, the table shows the distribution of the Masters Candidatus/Professional Bachelors among the various sectors in question Q.1.8.

3.1.7 Q.1.14. Is your job covered by an academic collective agreement /occupational category?

Figure Q.1.14. shows the Master's Candidatus distribution across academic collective agreement/non-academic collective agreement.

| 1.14 Is your job covered by an academic collective agreement /occupational category? |
|--------------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| 0%                                   | 25%             | 50%             | 75%             | 100%            | Number of replies |
| Yes                                  | 71              | 0               | 0               | 0               | 17              |
| No                                   | 24              | 6               | 0               | 0               |                 |
| Don't know/Would prefer not to say  | 6               |                 |                 |                 |                 |

There is only one response category as they are either on an academic collective agreement or not. The total number of respondents is shown to the right of the figure.
3.1.8 Q.1.11. What is your monthly salary?

The figure for question Q.1.11. shows the Master's Candidatus/Professional Bachelor's monthly salary. The levels of salary are shown for graduates on a non-academic collective agreement, graduates on an academic collective agreement, Professional Bachelors as well as a total.

The numbers state the percentages and sum up to 100 within the specific categories. To the right of the figure, the total numbers of responses that provide the basis for the percentage rates are shown.

3.1.9 Q.1.16. Are you in charge of other employees?

Figure Q.1.16. shows the distribution of Masters Candidatus/Professional Bachelors that are/aren't in charge of other employees.

The distribution is shown in percentages. The total number of respondents is shown to the right of the figure.
3.1.10 Q.1.18. Breakdown of your job functions. Top 10 over how much time the respondent spends on these job functions

The figure for question Q.1.18. shows which job functions the respondents spend time on as well as how much time they spend on the specific categories.

Below is shown the ten job functions the Masters Candidatus/Professional Bachelors spend the most time on.

<table>
<thead>
<tr>
<th>Job Function</th>
<th>Average Time Consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial and accounting duties</td>
<td>4.0</td>

The figure shows the percentage of Masters Candidatus/Professional Bachelors that have chosen the specific category. The categories do not sum to 100, as it was possible for the respondents to check more than one option.
3.2 Unemployed, including maternity leave without being under employment contract

This section describes the job situation for the Master's Candidatus graduates who answered the introductory Q.1.1 with "unemployed".

3.2.1 Q.1.32. After completing your studies, have you had one or more jobs (including leave of absence, maternity leave, job with wage subsidies, part-time employment, or similar)?

The figure for question Q.1.32. shows how many of the unemployed Masters Candidatus/Professional Bachelors have had one or several jobs since finishing their studies. They can choose between yes or no.

<table>
<thead>
<tr>
<th></th>
<th>Number of replies</th>

</tr>
<tr>
<td>There is no connection between my previous programme of study and my Ph.D</td>
<td>0</td>
</tr>
</tbody>
</table>

The distribution is shown as a percentage. The total number of respondents for each response category is shown to the right of the figure.
4 Correlation between Master’s Candidatus/Professional Bachelor’s education programmes and the job market

A main element in the educational programmes offered by the faculty is that they prepare the graduates as well as possible for the job market by giving them the skills that are sought after by employers. The graduate surveys of the University of Copenhagen can thus gather information on the graduates’ assessment of how much the educational programmes have prepared them for the job market. The question is whether the Master’s Candidatus/Professional Bachelor’s graduates experience that there is agreement between the skills they are expected to possess on the job market and the skills they have acquired during their education at the University of Copenhagen.

4.1 Academic correlation between studies and job
4.1.1 Q.1.12./Q.1.13. How would you describe the correlation between your area of study and your job?

The figure for question Q.1.12./Q.1.13. shows how the Masters Candidatus/Professional Bachelors assess the correlation between their education and their job.

The distribution is shown as a percentage. The total number of respondents is shown to the right of the figure.

4.2 The ability of the study programme to prepare the graduates for working life
4.2.1 Q.2.1. To what degree do you feel that your programme of study has adequately prepared you for your working life?

The figure for question Q.2.1. shows to what degree the Masters Candidatus/Professional Bachelors feel that their programme of study adequately has prepared them for their working life. The response categories show either to a high degree, to some degree, to a lesser degree or not at all.
The distribution is shown as a percentage. The total number of respondents for each degree is shown to the right of the figure.
4.2.2 Q.2.4. How do you think the University of Copenhagen could improve upon how it prepares graduates for the demands of the labour market?

The figure for question Q.2.4. shows in order of priority, what areas the Masters Candidatus/Professional Bachelors think the university could improve upon to prepare the graduates for the demands of the labour market.
Solving tasks in collaboration with both private and public businesses/organisations

More/better opportunities for work experience, project-oriented courses or project partnerships with private...

Better guidance regarding the needs of both private and public businesses/organisations

More guest lecturers and teachers from both private and public businesses/organisations

More actual case studies within the programme

More practical assignments and courses (e.g. languages, supplementary tools, communication...)

Business-oriented teaching (e.g. basic business knowledge)

More choice of courses that are aimed directly at private as well as public companies/organisations

A higher degree of interdisciplinary studies within the course programme

More business/company-based presentations at the university

More methodology/supplementary courses

More/better career fairs at the university

More/better study and career advice

More/better opportunities for study abroad

Other

More theory within the course programme

The figure shows what percentage of the Masters Candidatus/Professional Bachelors that have chosen the specific category. The categories do not sum up to 100 as several categories are available for selection.
4.2.3 Q.2.2./Q.2.3. Correlation between acquired skills and skills sought after on the labour market

The figure shows the labour market demanded skills from question Q.2.3. out the x-axis and acquired skills from question Q.2.2. up the y-axis.

The numbers on the bars for the specific skills in the figure shows the average in the degree the respondents have answered to have acquired the following skills through their education measured on a scale from 1 to 4, where 1 is 'Not at all', 2 is 'to a lesser degree', 3 is 'to some degree' and 4 is 'to a high degree'.

4.2.3.1 Top 5 skills

Figure 1 for question Q.2.2. shows the 5 skills the Masters Candidatus/Professional Bachelors feel they have acquired to the highest degree through their programme of study and that they think the labour market to the highest degree demands. The responses for each skill are displayed with a bar.

4.2.3.2 Bottom 5 skills

Figure 2 for question Q.2.2. shows the 5 skills the Masters Candidatus/Professional Bachelors feel they have acquired to the least degree through their programme of study and that they think the labour market to the highest degree demands. The responses for each skill are shown with a bar.

5 Master’s Candidatus/Professional Bachelor’s graduates routes to their first job

This section deals with the Master’s Candidatus/Professional Bachelor’s graduates’ first job. There are several interesting questions in this regard, such as: How long did it take them to get a job? When did they start actively looking for jobs? What factors are relevant to getting a job as a recent graduate?

5.1 Master’s Candidatus/Professional Bachelor’s graduates first job

5.1.1 Q.3.1. How long time did you have to wait between graduating and obtaining your first job (incl. job with wage subsidies)?

The table for question Q.3.1. shows how long time the Masters Candidatus/Professional Bachelors had to wait to obtain their first job.

<table>
<thead>
<tr>
<th>Masters Candidatus</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I got the job before completing my studies</td>
<td>46%</td>
</tr>
<tr>
<td>0 - 3 months</td>
<td>17%</td>
</tr>
<tr>
<td>4 - 6 months</td>
<td>25%</td>
</tr>
<tr>
<td>7 - 12 months</td>
<td>8%</td>
</tr>
<tr>
<td>More than 12 months</td>
<td>4%</td>
</tr>
<tr>
<td>Number of replies</td>
<td>24</td>
</tr>
</tbody>
</table>

The table shows the percentages of each time interval.

5.1.2 Q.3.19. When did you start actively looking for a job?

The table for question Q.3.19. shows when the Masters Candidatus/Professional Bachelors actively started looking for a job.

<table>
<thead>
<tr>
<th>Masters Candidatus</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Before starting your Master's (Candidatus) thesis/final project or exam</td>
<td>14%</td>
</tr>
<tr>
<td>Before delivering your Master's (Candidatus) thesis/final project or exam</td>
<td>34%</td>
</tr>
<tr>
<td>After delivering your Master's (Candidatus) thesis/final project</td>
<td>21%</td>
</tr>
<tr>
<td>After passing your Master's (Candidatus) thesis/final project or exam</td>
<td>31%</td>
</tr>
<tr>
<td>Number of replies</td>
<td>29</td>
</tr>
</tbody>
</table>

The table shows the percentage share of each group.
5.1.3 Q.3.1. How long time did you have to wait between graduating and obtaining your first job (incl. job with wage subsidies)? by Q.3.19 When did you start actively looking for a job?

The figure for question Q.3.1. distributed on Q.3.19. shows the average scores on Q.3.1. for the Masters Candidatus/Professional Bachelors, distributed on response categories of when they actively started looking for a job.

The average is calculated on a scale from 1 to 5 where
- 1 corresponds to 'I got the job before completing my studies',
- 2 corresponds to '0 - 3 months',
- 3 corresponds to '4 - 6 months',
- 4 corresponds to '7 - 12 months' and
- 5 corresponds to 'More than 12 months'.

The actual number of respondents for each response category is shown to the right of the figure. Only one response category is possible.
### 5.1.4 Q.3.2. What do you believe was the primary reason that you got your first job (including job with wage subsidies)?

The figure for question Q.3.2. shows in order of priority, what the Masters Candidatus/Professional Bachelors believe were the primary reason that they got their first job.

<table>
<thead>
<tr>
