

Uddannelsesspecifikke spørgsmål

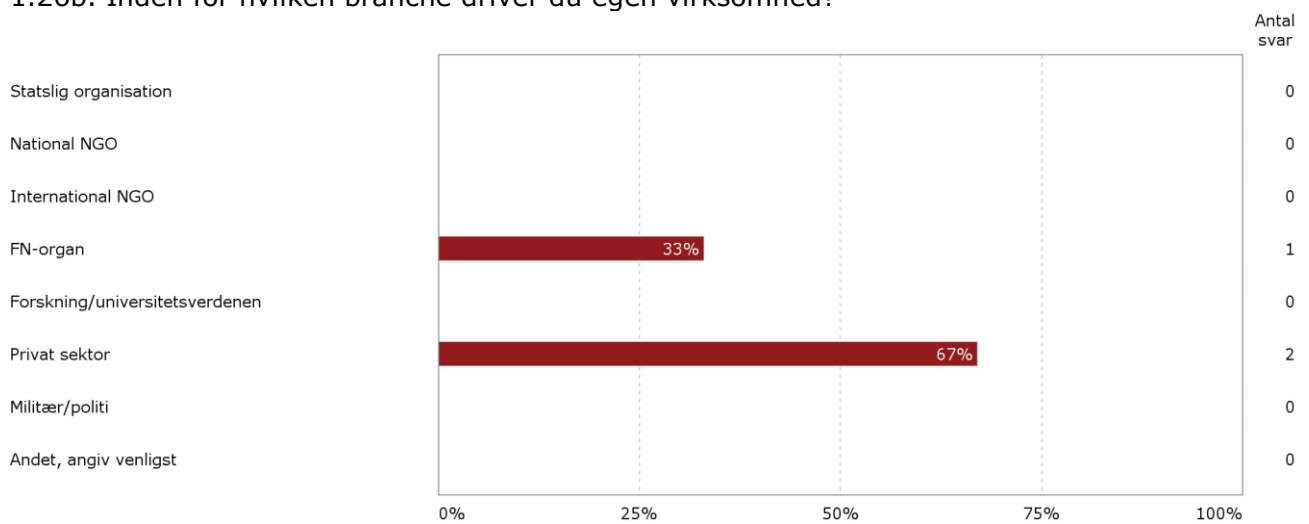

Katastrofehåndtering

Katastrofehåndtering

1.14b. Inden for hvilken branche er dit nuværende (eller seneste) job?

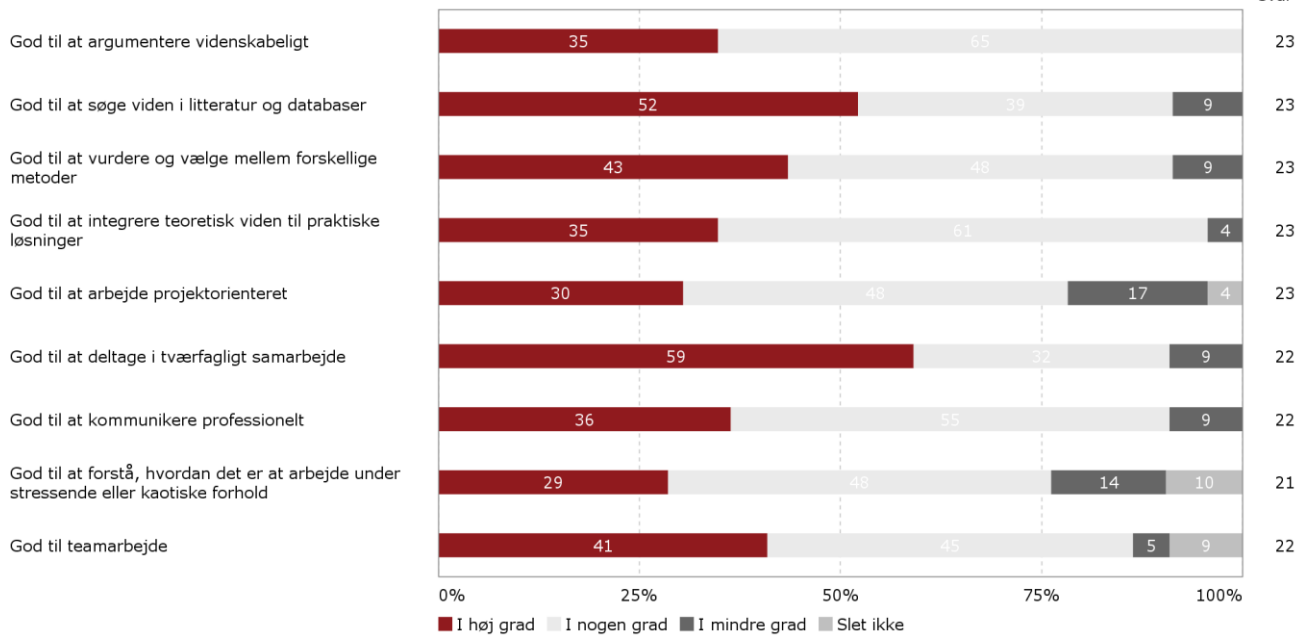

1.26b. Inden for hvilken branche driver du egen virksomhed?

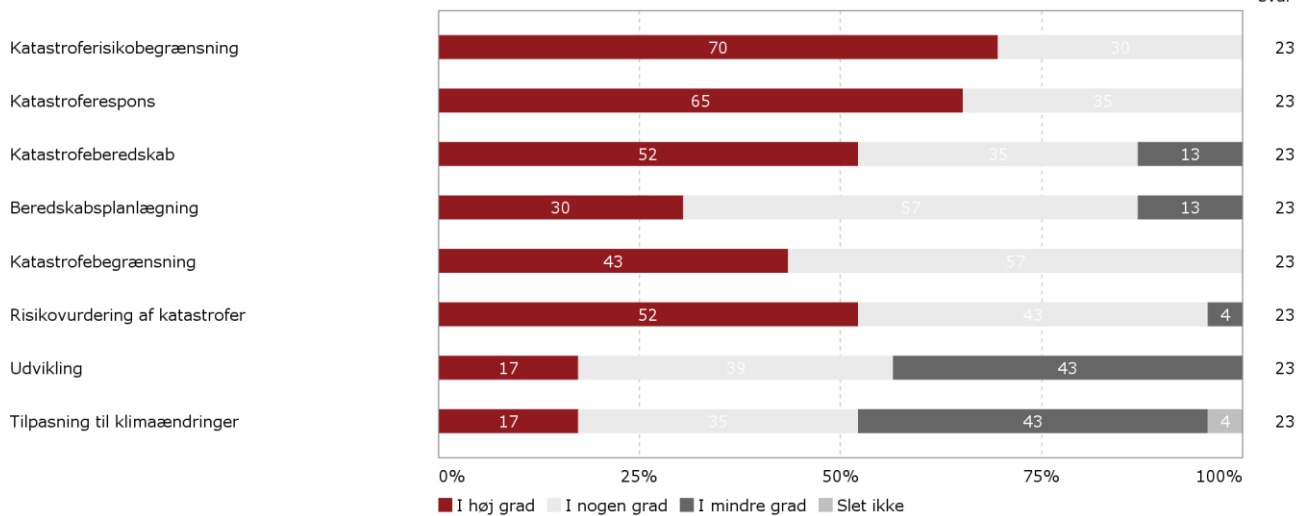

2.6b. Jeg vurderer mine kompetencer som følgende:

Antal svar

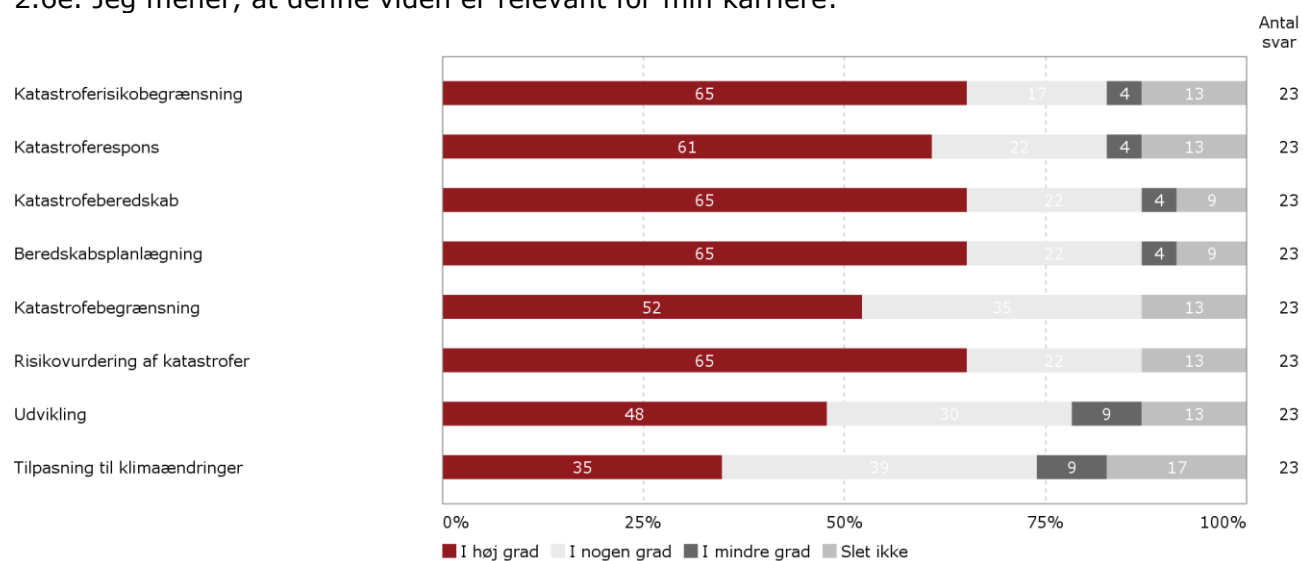

2.6d. Jeg mener, at jeg har opnået viden inden for følgende områder:

Antal svar

2.6e. Jeg mener, at denne viden er relevant for min karriere:

3.6b. Baseret på din erfaring, da du afsluttede dine MDMA-studier, er der øvrige emner end de ovennævnte, som programmet efter din mening bør dække mere intenst for at forberede kandidater til deres karriere?

- 1. Climate Change
- 2. GIS in Disasters
- 3. International and National Politics and Disasters
- 4. Disaster Recovery Project Design, Monitoring and Evaluation
- 5. Policy Evaluation and Analysis
- 6. Epidemiology of Disasters
- Beredskab (myndighedsopgaven) i en europæisk sammenhæng skal dækkes mere og på et væsentlig højere niveau, hvis uddannelsen skal være relevant for mig og mine kollegaer - eventuelt med et særligt valgfrit modul. Større del af uddannelsen skal være korte moduler, hvilket også ville gøre det muligt for tidligere studerende at tilkøbe nye tema-moduler som efteruddannelse.
- Disaster Response mechanism case studies in various settings and countries, actual exercises and more sharing of experiences by peers
- For health people 'TRIAGE FOR CAUSALITY IN HEALTH SETTING'
- GIS course should be available in Copenhagen so that students do not have to worry about the extra cost of staying and studying in Geneva. Having a GIS skill greatly helps the graduates to get disaster management related jobs.
- Information analysis and information gaps - complexity
- Language courses. FRENCH is super important for the humanitarian world. You should offer a French course for the whole length of the programme. People might hold two Masters degrees; but if they do not speak the language they will have problems in finding a job.
- Localisation of humanitarian action and accountability to affected persons. How to mainstream risk management in strategically and operationally

- More hands on subjects. Log frames, project development, construction techniques, assessments, budgets, etc.
- Project planning and management.
Logistics planning
- The program should incorporate international humanitarian law, human rights laws during the response phase especially for people that will work in armed conflict situation
- climate change (som seperat modul)
